

ARJUN WARUNGASE

Aspiring Software Developer • Engineering Student • Embedded Systems Enthusiast

Professional Summary

Passionate student engineer focused on software development, embedded systems and intelligent automation. I enjoy transforming ideas into real projects by combining programming, electronics and engineering design. My current flagship project is Moss OS, an Arduino-powered smart ecosystem with a live monitoring dashboard.

Technical Skills

Programming	HTML5, CSS3, JavaScript, Arduino (C/C++), Git
Web	Responsive Design, UI Development, Vercel, GitHub
Engineering	Embedded Systems, Sensors, Automation, Electronics
Tools	VS Code, Canva, Microsoft Office

Featured Projects

Moss OS

Arduino-powered intelligent ecosystem with automation, sensors and a responsive dashboard.

Retro Pong

Modern browser recreation of Pong using HTML5 Canvas and JavaScript.

Developer Portfolio

Responsive engineering portfolio documenting projects, achievements and technical growth.

Achievements

- 50+ Certificates • 15+ Awards • 9+ Medals
- Computer Olympiad First Rank (2024, 2025)
- Computer Search Exam First Rank (2023)
- NSTSE National Rank 80
- Logic Quiz International Rank 31 & 944
- NASO Level 1 Qualifier
- Science Fair, Scientia Nashik & Astronomy Workshops
- WhiteHat Jr App & Game Developer
- Tata Building India Essay Competition Winner
- Ignited Mind Lab A Grade (2024 & 2025)

Current Mission

Status: Active Development

Project: Moss OS

Focus: Hardware Integration, Sensor Calibration, Arduino Programming and AI-assisted ecosystem monitoring.

Career Objective

To continuously learn, build impactful engineering projects, contribute to open-source software and pursue a career in technology that solves meaningful real-world problems.

Designed as the companion resume for my engineering portfolio.
